Accessibility Tests  
Jest / Unit Tests

---

## # Professional Experience

### Full-Stack Web Developer | Freelance

2018 - Present: Buffalo, NY | Remote

- ↳ Design and configuration with Bootstrap, JavaScript, Chrome DevTools and React to improve UI/UX and system flexibility of projects.
- ↳ Integrated solutions to freelance clients by resolving UI issues and implementing new product features for single-page applications.
- ↳ Validated sites with developer tools and media queries to ensure cross-platform compatibility and mobile responsive web designs.
- ↳ Leveraged knowledge and resources in full-stack for code reviews, version control, and debugging utilizing developer tools and Git.

### Desktop Support & Remote Design Consultant | Top's Kitchen & Granite

June 2018 – Dec 2018: Norcross, GA | On-site & Remote

- ↳ Performed exceptional troubleshooting service for computer hardware, displays, peripherals, and cable networks.
- ↳ Customized interior room designs for contractors and clients utilizing the 20/20 Spaces design program.
- ↳ Utilized Active Directory to create, delete, set accounts, and change user passwords for management.

### Database & Online Tools Management Intern | Hunter James Kelly Research Institute

October 2016 – April 2018: Buffalo, NY | On-site

- ↳ Responsible for data entry and management of over 500 antibodies from lab records into Microsoft Access database.
  - ↳ Collaborated with management and software team using SDLC to implement research database tool onto institute's website.
  - ↳ Remodeled past database for efficiency and deployed database macros to make accessible inquiries for researchers.
- 

## # Technical Projects

**Portfolio Website** – <https://edjunma.dev> (for additional information and projects)

**GitHub** – <https://github.com/edjunma> (for project source codes and open source contributions)

**E-commerce Clothing Store App** – <https://ejm-crwn.herokuapp.com>

- ↳ Full stack ecommerce application using React, Redux, and Hooks for the front-end. GraphQL, Firebase, Stripe, and Context API for the back-end and payment system. Includes features like shopping cart, checkout, add/delete items, and routes to clothing categories.

**Face Recognition App** - <https://smart-brain-v2.herokuapp.com>

- ↳ Full stack web application that detects faces from image inputs utilizing Clarifai Face Detection API. React for the front-end and Node.js and PostgreSQL/MongoDB for back-end. Some features include registering user accounts, sign-in/sign-out, and also tracking the amount of user image entries submitted into the backend.
-
